

Analysis of parent's use of the website

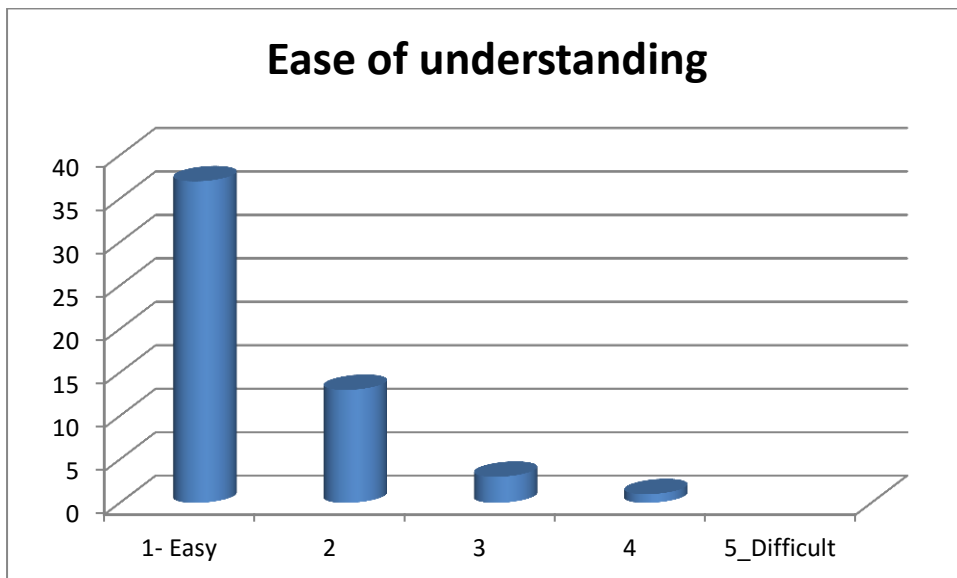

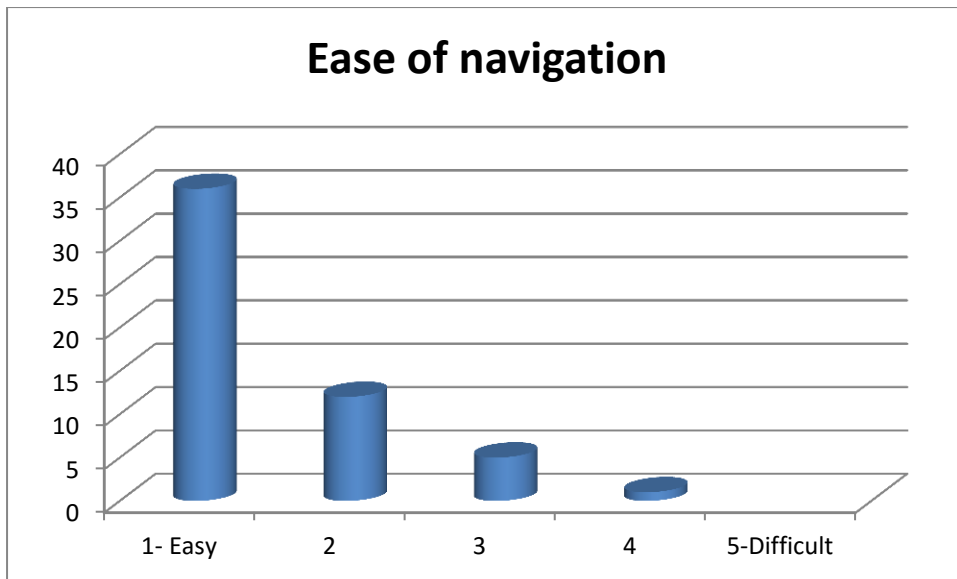

A questionnaire was handed out at parent's evening to establish why parents used the school website and how user friendly they found it to be.

66 parents responded. Of these 12 said they never used the website and of those four did not know of the site's existence.

Findings

Asked if the website was easy to access **53 of those who completed this section confirmed it was** and one responded "no".

The survey gave parents the opportunity to comment on the content of the site, in particular areas that they thought might be missing, and to make comment generally.

19 parents commented in this section and a number of themes emerged. These were:

- Eight said that the site provided everything they needed
- Three wanted to see more about their children’s class progress
- Three praised the website
- Two wanted to see pictures of children enjoying learning
- Three asked that the homework section be better updated

To give a flavour of the comments these included:-

“wishing to see updated pictures”

“homework is not always correct”

“I find the website good but text messages are very useful”

“letters could be sent home on-line rather than as paper copies”

“information on line should be more concentrated in one place”

“ unable to find information on Friends of Mengham School (FOMS)”

“ it would be useful to have assembly dates and when parents could attend”
